Interaction, the newsletter of the Henry Martyn Institute, is published twice yearly.

The Henry Martyn Institute (HMI) established in 1930, is a study and praxis oriented centre specialising in the study of Islam and working for reconciliation between people of all faiths. HMI's efforts are in response to the contemporary context of inter-religious misunderstanding and violence, and it promotes activities that remove prejudice, resolve conflict and increase trust and cooperation between individuals and groups.

Academic programmes at HMI include a nine-month Post-Graduate Diploma in Islam and Interfaith Relations, one year Post-Graduate Diploma in Conflict Transformation, Peace-Building and Interfaith Relations, and a Master of Theology Degree Programme in Islam offered through the Senate of Serampore and Luther Seminary in USA. Each May, the Institute also organises a two-week intensive Summer Course on Islam and Interfaith Relations. HMI also offers daily language classes in Arabic, Urdu, and Persian, a ten-week Intensive Summer Language Programme and a two-week Peace Building Programme.

HMI's commitment to the work of reconciliation translates into ongoing Praxis programmes for building bridges of understanding between Muslims, Hindus and others at grass-root levels. This includes practical work in three community development centres in slum neighbourhoods of Hyderabad, an HIV-AIDS awareness programme, and short and long-term training programmes in conflict transformation and peace building.

World is passing through various forms of revolution, and communication revolution is one such. It is true electronic media has overtaken other medias, but still the printed word holds a place of importance in our world. It becomes an enduring means of communication, and is helpful to build up relationship. It is with this motive that we continue to communicate with you through our newsletter – **Interaction**. You get a glimpse into the activities of the institute during the last six months of 2012. Much water has flown under the bridge and many are the activities that we entered into trying to uphold the high ideals of the institute. A good many NGOs took advantage of our facilities and conducted workshops over here, thus cementing our friendship, and making our relationship more meaningful. We are aware that perfection is not possible as we need the help of many hands to run such programmes. But still with all limitations we could achieve much, and we can be justly proud of our achievements. What we look forward is your constant encouragement and suggestions to improve our performance.

As we know mankind is passing through difficult times, and we need concerted effort to bring about changes in the concrete situations that we are facing. This being a herculean task it is not easy to achieve single handedly; we need the support of one another for strengthening and revamping our energies for facing up to the challenges that come our way. In fact our strength has been the support of our partners and well-wishers, who have offered their unflinching and generous help. If not for this ready availability of various groups of people all our efforts would have been fruitless. We acknowledge our debt of gratitude to all those who have made our hands strong through their generosity and constant encouragement. Also we want to let you know that we are aware of our limitations, but still we want to strive as best as we can and achieve all that we can by taking into account the vicissitudes and givenness of the situation. We are urged on by hope, the greatest asset of the human being, that the good Lord will not let us down and will walk with us giving us the assurance of a better future. We seek your continued support and good will for bringing into effect the goals we have set before us. May the God of peace and joy accompany your life's journey guiding every step of yours so that you can march ahead without faltering.

Mt. Abu, Rajasthan, 29 Nov – 2 Dec 2012

Ramesh visited Kandhamal twice (5th-8th Sept. 2012 & 22nd -29th Oct. 2012) and engaged with Forum members and ASK representatives and took part in developing strategy paper and a three year work plan.

Sanjaal Network, Nepal

Nine members from the Sanjaal Network representing three organizations namely (United NGO Mission, Community Development Forum, Moirang and the Network Secretariat) visited HMI from 8th- 11th Dec2012. The main purpose of the visit was to learn some good practices related to Interfaith and peacebuilding work as well as to gain new ideas on how to mainstream

peacebuilding agenda through community engagement.

The 9 members (6 male & 3 female) were from Hindu, Christian, Muslim, Buddhist, and Kirat communities. They visited community development and empowerment centers run by Shaheen and HMI in the Old city and learnt many valuable lessons by interacting with women activists, social workers, counselors, teachers and health workers. This was followed by workshop facilitated by Ramesh and Robinson on how to practically and creatively work for peace, justice and reconciliation. The network members also worked on follow-up work plans, which include some collaborative work with HMI in Nepal for the year 2013 and beyond.

Internship

Mustaq from Gujarat is interning with SMET, Ahmedabad for a period of 9 months. He is involved in running short term courses that help youth to build their communication, presentation and social media skills. He is also part of a street theatre group and works with a small group of theatre activists in creating new plays.

Publication and Dissemination

Videos

Two videos that capture and communicate voices, aspirations, challenges, hopes, testimonies of transformation and efforts taken to bring change, feedback to HMI on CT work were completed in this period. The videos help communicate various stakeholders with whom we work, their identity, context, initiatives and help better understand

the gradual changes and transformation that we see. The videos also help communicate the engagements of women and these will serve as motivating examples for others. This video most importantly helps in breaking the myth that women talk about only women's issues and gives a wide variety of issues and struggles that they are engaged in.

Digital Library

CT team began the work of consolidating and categorizing digital resource materials on various topics and issues related to peace, justice and reconciliation have been able to categorize most of the materials available for easy reference by peace practitioners, scholars and activists. We have rather a good collection of digital books, manuals and articles to be shared with other peace builders. We have consolidated digital resource materials on 15 different topics to help with the monograph-writing project. We have a good collection of digital materials on critical study of histories and have been able to share it with interested people in the region.

Staff Training and Development

Ramesh took up online course on Methods of Analysis & Research for Peace-TRANSCEND Peace University, Austria, March-May 2012. It has helped to enhance research and analysis skill making it also possible for helping other people take interest in cultural, religious, literary resources for peace building work.

Robinson participated in the PeaceCounts Training of Trainers, Fort Kochi, Kerala, 26-30 June 2012- It has helped to gain skills on the use of pictures and posters for peace building work.

Management

Administration

For any organization administration is its backbone; admin. department is working hard to improve facilities available at the Institute. The team is supporting Praxis, Academics and general programmes continuously. The issues are solved on a day to day basis to run the institute smoothly without any serious problems. As part of the infrastructure development, we purchased two lap-tops, one each for Conflict transformation and Administration departments to do the work in a more efficient way. New MS chairs were placed in the dining hall of the Hostel which are found to be quite comfortable. A new two wheeler was donated by M/s.TVS & Co. to enable the Hostel to do the regular material purchases. A few fabrication works were carried out in the hostel and programme building with a couple of MS sheets.

Most of the major equipments are now under comprehensive annual maintenance contracts, which include computers & printers, water purifiers, UPS systems, EPABX, the lift and photocopier. The generator and transformer are regularly serviced to ensure that all electrical fittings and fixtures function optimally.

Regarding property at Kottur, as Govt. of AP announced the Land Regularization Scheme in 2008, and 31st December being the last date for filing the application for regulation of unapproved layout/plot, we applied for the same by registering and making the 50% payment.

We have filed a writ petition in the High Court of Andhra Pradesh for exemption of the property tax for our Sivarampally property, and the matter is under judiciary review.

Additional Landscaping of a lawn near the electrical transformer is being carried out and a new small transportable fountain in the existing water tank was done in the garden which is a new attraction. A large volume of variety of plants were brought during the period and placed in different areas of the campus to make it look more beautiful and attractive.

City office premises are being made use of for various workshops, prayer meetings, seminars, etc., by various groups who have likeminded programmes to those of HMI.

Construction of the New Library Building - Phase IV

To update on construction of our new library building, a land survey was done by the appointed surveyor, and the survey report was sent to our Architect to finalize the building drawings. The final drawings were presented to the board meeting held in August 2012 which was approved and it was resolved to approach the Greater Hyderabad Municipal Corporation (GHMC) to get the permission for construction. Meanwhile ground excavation work was done with *morram* (sand mud) filling and keeping in mind the usage of water for construction a bore well survey was done, and fortunately it was found that the spot was near the site of the new building; and we were advised to dig a bore well at the depth of 500 feet; and accordingly the new bore well is dug and also a 5HP motor pump is installed.

We submitted an application to the fire department to get a No Objection Certificate (NOC) on 3rd October 2012 for the new construction. We had to face lots of challenges in the process as there were lots of changes in their rules for obtaining such permission. The fire department has issued NOC on 28th November. We have applied for the permission to do new construction to Greater Hyderabad Municipal Corporation on 1st December 2012 with the approved plan and the necessary documents required by them.

Those who aim at promoting peace and justice find comforting energies by temporarily staying at abodes fit for their dynamic activities in favor of harmonious living. The Complex net-work that caters to the wellbeing of the multitude of socially discriminated persons in India, needs lot of search for serene and welcoming set-ups in order to benefit from positively refreshing spaces that may provide energizing powers to the emerging plans in favor of the human upliftment.
